

Call with Donnie Poe and Joe Brogan (And Allison Austin, Tom Cinti, Chris Thomas) re: Campground at former Honeywell – 6.6.22

Walking path/trail through Avtex property; connecting up to Honeywell property

Campsites – would like to put concrete pad for each site or gravel (\$68-74); water, sewer, and electric hookups for each

Town put limit of 140 days (ordinance requires limit, including hotels etc.); expect people wouldn't want to stay longer than 10 days

"Scrub trees" – 40 or 50 year old trees 20" caliber; some 30 ft tall; want to keep as much trees as possible (both for money, work, and shade purposes)

Allison – CWP

- CWP would encourage wetland delineation
 - Did phase 1 but that didn't address
- Campgrounds and people can generate a bit of trash
 - Site manager 2 FT employees

Floods – gravel moves, concrete stays

- Minimal excavation needed; no cuts and fills
